# MACHINE GUARD SEASON PROTECT

Protection for your essential  
harvest season equipment

MACHINE GUARD

## Season Protect Benefits

- ⚙️ Season-long mechanical cover available for all harvesting equipment
- ⚙️ Available at a fraction of the cost of common component failures
- ⚙️ Available with your post-harvest service, giving you all year round peace of mind
- ⚙️ Repairs carried out by your local dealer
- ⚙️ Guaranteed genuine manufacturer parts
- ⚙️ Fixing your harvest season operating costs
- ⚙️ Saving you money and reducing equipment downtime

As the preeminent provider of machinery extended warranties, we are continually thinking of new ways to make customers' lives easier through innovation. We have developed a number of unique coverages and products including the **Season Protect** warranty for the Agricultural industry.

**Season Protect** is a short-term derivative of our core Machine Guard warranty product which allows farmers to protect their harvesting equipment for the critical three-month harvest period. As much of this equipment does not get used throughout the rest of the year, it can sit idle for many months at a time. **Season Protect** gives farmers the reassurance that when they do come to use it at such a critical time of year, the machinery is protected from sudden or unforeseen breakdown.
